Dear Greta,

In India, exams play a vital role in our life. How exactly do you overcome the exam stress? Is it really a tough situation as people talk about it or is it just a myth? We give a lot of importance in developing a skill right from our childhood. Nowadays we have been deprived of our hobby time. How exactly do we manage time between hobby time and academics?

We believe that LIFE means Learning In Full Enjoyment. But always having a learner's mindset is pretty inevitable. How should one own their perspective in terms of learning and critical thinking?

A nation's Culture resides in the heart and in the soul of its people.

Culture in India creates a sense of unity and identity. What's your perspective about insisting on culture in one's life? Why do you

Culture plays a significant aspect in a country's unity and integrity?

We as students love to show care for our mother earth! Climate change is playing an important role in shaping our future environment. As a part of our school community we have been

integrating SDGs in every sphere of our life. How else can you suggest us, students, to bring about a significant change in our society? Many

of them say Failure is the First Attempt In Learning, but it is hard to overcome the fact that

failure isn't final. What's your suggestions to this dilemma? What do you suggest to people who still think that they are incapable of

achieving something? To know the true nature of a person unknown, just see closely and correctly the character of

known people who truly like him or her.

It's been great writing a letter to you! Thank you for your time and patience.
