

VISHWAVIDYAPEETH | EVERYTHING YOU NEED TO KNOW ABOUT JUNE

“ THE DISTANCE BETWEEN DREAMS AND REALITY IS CALLED ACTION.

– Brian Tracy

It's the second month of the academic year and it has been one of the enormous importance and occasions. With many learnings extracted from this exceptional period by the students and a new catch up for the teachers, the month of June was a teaser for all of us on what we are going to be experiencing this year. Elections? Projects? Sports? You name it, we have it listed. This year for your best experiences of the tremendous recaps every month, we worked even harder. The monthly newsletters by a team of students are editing, forming, and bringing it all together with a little gen-z touch. So strap up because this month was an exciting one and don't forget to keep in touch for the many more to come. Happy reading!

THE EDITORIAL BOARD

INAUGURAL HOMA

To ignite the fire of wisdom and knowledge the management of Vishwa Vidyapeeth performed the auspicious Hayagreeva Homa on Sunday 4th June 2023 at the school campus. The homa was to fan the flame of learning and enlightenment. The assembly was briefed by our beloved Director ma'am Smt. Suseela Santhosh on the significance of the Homa. The homa was a crucial component of our Dasha Prabodha ideology. Hayagreeva Homa relieves mental strain, enhances one's capacity for concentration, and comprehension of difficult concepts. It is also known to magnify extracurricular activities related to skills such as dance, music, etc. and of course help young VVPians acquire all ten skills. The sacred slokas from Bhagavad Gita were solemnly chanted by our students. Parents and students were invited to witness the holy event and receive the divine blessings.

VVP DECLARES CAMPUS AS A PLASTIC FREE ZONE!

Class I: Organic Farming: As a part of Dasha Prabodha , Students of class I are exploring organic farming. Under the able guidance of our beloved Director ma'am Smt. Suseela Seetharaman, Vishwa Vidyapeeth school introduced chemical free farming and taught them the steps involved in growing organic crops starting from sowing seeds, removing weeds and watering the crops.

sewa club

WORLD ENVIRONMENT DAY 2023 FOCUSES ON SOLUTIONS TO PLASTIC POLLUTION.

WORLD ENVIRONMENT DAY

On 6th June, students of grades IX and X of Vishwa Vidyapeeth CBSE wing took part in a seed planting activity in commemoration of world environment day. World Environment Day is held on 5th June every year. For 2023 it had an important theme of "Beat Plastic Pollution". Inspired by this, students were required to bring Mango seeds or Jackfruit seeds along with a few sheets of newspaper. On the day of the activity, students were taken outside their respective classrooms and near the mango tree on the campus. They started the activity by making paper bags with a few sheets of newspaper and basic supplies including glue, scissors and ribbons. After all students had made their respective paper bags, they started with covering their seeds with a few layers of mud. Once the seeds were aptly covered, they were placed inside a paper bag each. The bags along with the seeds were kept beside the school building to dry. These will be given out during the next Parent-Teacher Meetup.

Here at Vishwa Vidyapeeth such unique activities are conducted to bring about awareness in the students on ethical reasons one such being the ecological balance. The students are groomed for the future and prepared to save the planet with many such initiatives.

YOGA DAY

"Yoga is the journey of the self, through the self, to the self."
-The Bhagavad Gita

On this day, students of VishwaVidyapeeth united to celebrate health and well being as well as our culture being spread throughout the world together. Falling under the satvik ways to a happy life the dashaprabodha approach includes the mental well being through yoga. They sought inner peace and tranquility with simple meditation. The event left a lasting impression on everyone, as it was a day filled with camaraderie, self-reflection, and shared experiences.

Our esteemed Director maam, Smt Suseela Santosh and Principal, Smt. Shanthi Seetharaman inaugurated the event by lighting the jyoti deepam and motivated one and all by a set of yoga demonstrations. The day was most memorable in the pages of our academic calendar. The teachers along with the students demonstrated various asanas meticulously with a lot of zeal and enthusiasm. International Yoga Day serves as a reminder of the power of unity, self-care, and inner peace, leaving us with a profound sense of connection and lasting inspiration to continue our yogic journey throughout the year. By embracing the principles of yoga, the students not only improve their physical well-being but also fostered a sense of unity and harmony.

योगाश्चित्तवृत्तिनिरोधः

BEHIND THE SCENES

of yoga day

Yoga Day was celebrated rather pompously here at Vishwa Vidyapeeth and all that decoration was prepared by these students! Guided by the experts of the art block, students painted and designed the boards and life sized asanas for almost an entire day. "As someone who wants to get into the art community the experience was mesmerizing, Working with so many talented people had a very proactive feel to it" reports one of the 10th graders in the group. In this school learning does not limit to books and classrooms, the students learn from every experience they undergo and have loads of fun in the process.

Under the SEWA club initiatives the students of class XI planned and executed an activity to adopt 3 R's Reduce, Reuse and Recycle. Grade 11's first Work Experience class included the making of eco-friendly dusters. They were to be made of cotton and cloth with the help of a sewing thread and needle. Guided with precision and care by their Work experience coach, they learnt how to cut and sew a cotton-stuffed cloth. "These dusters were very creative and fun to assemble." reports Vamshi M, a student of grade XI Science. These customized dusters were specially made to be donated at government schools. Work Education helps students develop skills like work values, productivity, and self-reliance which are exactly what they need for the world they are yet to see. Here at Vishwa Vidyapeeth such causes are treasured under the Dash Prabodha custom of honing children to their strengths.

Class 11

WORK EXPERIENCE

INTERNATIONAL YOGA DAY CELEBRATION CLASS I TO V:

The students of grades I to V solemnized the assembly with celebrations of international yoga day. Guided by experienced instructors, the young yogis practiced gentle stretches, postures, and deep breathing exercises. The assembly fostered unity, mindfulness, and physical well-being, leaving the students with a sense of harmony and peace. International Yoga Day served as a reminder of the universal benefits of yoga and its ability to nurture holistic development in young minds.

22nd June

SERENITY AT THE STEPS:

Yoga in front of The Vidhana Soudha

YOGA @ KANIVE BASAWESHWARA TEMPLE

The students of Vishwa Vidyapeeth of class IX and X were taken on a field trip as a part of the Heritage Club -Parampare activity. The trip was to Kanive Basaveshwara temple and Yoga Nandeeshwara temple near Nandi hills to witness the shrine which boasts of a massive stone idol of the bull Nandi. It is said to have originated on its own "Swayambhu" in perfection over a thousand years ago. The temple priest informed the students that the sculpture, presently at least 10 feet tall and 15 X 5 feet across, was only a couple of feet tall some 40-50 years back and will perennially continue to grow in its proportions till it comes alive in its enormous majesty on the Judgement Day as foretold by ancient Hindu scriptures.

We took the opportunity to sit and meditate peacefully in the temple. The students had the opportunity to witness Mangala aarathi and blessings of the god.

Followed by this was a visit to Yoga Nandeeshwara Temple where the students performed Yoga Asanas and Surya Namaskar in serene lush green environment.

We also took the opportunity to learn about the ancient hydraulic structure- Kalyani or the Step Well situated in the temple premises. This was integrated with the geography chapter on Water resources- where in ancient times they were built to conserve water and revive the ground water table.

It was overall an amazing experience and we thank our Principal Smt. Shanthi Seetharaman for providing this wonderful opportunity.

SERVICE EXTENDED TO GOVT SCHOOL:

Vishwa Vidyapeeth always strives in improving access to quality education and as an initiative has adopted the Government School of Singanayakanahalli, Yelahanka. Our school selected teachers to enrich students of the above school in Sanskrit, Mathematics, yoga and other required subjects. Vishwa Vidyapeeth teachers facilitate learning skills and motivate the students towards holistic development.

The noble initiative to provide free education at VishwaVidyapeeth to the brilliant students of the Govt school was inspired and motivated by our esteemed Director ma'am, Smt Suseela Santhosh. Hence these rare gems are given a platform to excel themselves for a better future.

X-CLASS'S E-BOOKS: EMBARK ON A DIGITAL JOURNEY!

The class X pupils were eager to create their own ebook for the information technology course. During their summer break, it was planned that they would conduct research on the subjects of "Self Management Skills" and "Communication Skills" and then produce original content in the form of ebooks. For the benefit of the students, these ebooks will be printed and maintained in our school library's "Student Edition" section. The ebook was expertly created by the students, and it includes cover pages and pertinent images.

There are two factors for stress:

- Internal Factor
- External Factor

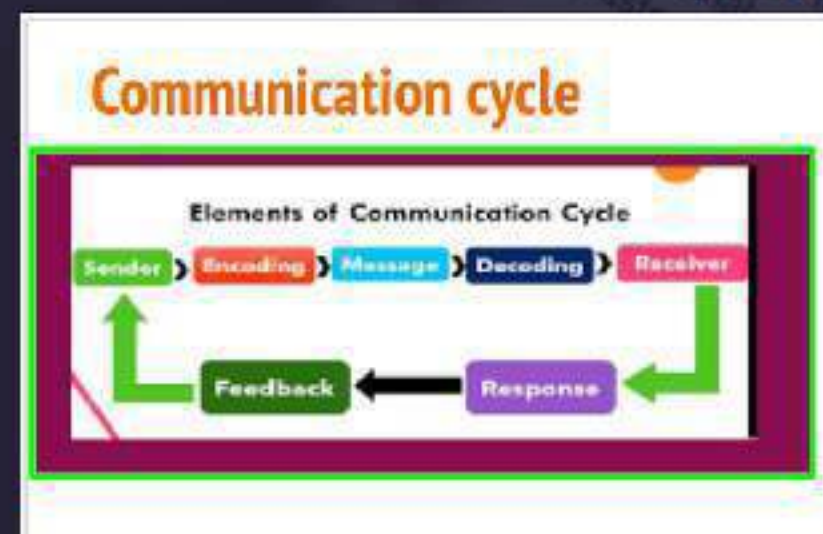

Stress Factors

}

Internal Factor

External Factor

Factors of Stress
Internal Factors are actually inside in someone's head like poor self-image, lack of self confidence, illness. There external factors aren't responsible.
External Factors like weather, social situation, climate condition, are responsible for stress. Sometime job, home sickness, exams are also responsible for it.

What is communication?
 Communication" is derived from the Latin word *commūnicāre* , which means "to share". Exchanging thoughts, information or knowledge. Throughout the communication process, information can be shared orally, in writing or via the use of another media

Shloka Chanting Class I and II:

On the eve of yoga day celebrations, the youngest students of class 1 & 2 were given three slokas for chanting on Friday, 09-6-2023. Students were very competitive and there were two rounds of selection. The young minds were very precise in pronunciation, intonation and delivered the content meticulously.

The best students were awarded certificates by our dynamic Principal maam. All the students displayed exceptional memory skills.

Quiz competition class III to V:

"Yoga is like music, the rhythm of the body, the melody of the mind, harmony of the soul that creates a symphony of life." To promote understanding in the concepts of yoga, a quiz was conducted on Friday, 9th June for all the students of Class 3 to 5. A multiple choice questionnaire were displayed in all classes via PPT and students wrote this quiz in an organized manner. The students who scored the highest were awarded certificates in the assembly by our beloved Principal Smt Shanthi Seetharaman.

ESSAY WRITING CLASS VI TO VIII:

The global concept of a single family... United Earth was promoted as an ideal topic for Essay Competition engaging class 6 to 8 students. Children wrote exquisite essays on the topic "Vasudhaiva Kutumbakam". Students presented informative essays written with emphasis on values and ethics. The best three students were selected and awarded with certificates. The honours were done by our very own Director maam, Smt Suseela Santosh.

NEWSPAPER ACTIVITY:

“Newspapers become of greater importance to the average man than scriptures.” To promote the habit of reading in students across the grades, VishwaVidyapeeth thoughtfully took a step ahead in introducing NIE in the classroom teaching. At the primary level various literary activities were conducted incorporating the NIE like Word Web, Vocabulary Tree, Noun Charades, Gamified vowels. Newspapers are an integral part of media that is a rich resource of information. Class 4 to 7 students read the news, highlight selected articles to identify and differentiate the different parts of speech. Colorful articles were cut out and pasted in a creative manner and students wrote captions for the pasted pictures. Students are also encouraged to read on a few topics and add their constructive comments on them.

Leaning Temple of India

In a recent study conducted by the Archaeological Survey of India (ASI), it has been revealed that the majestic Tungbath temple, nestled in the Garhwal Himalayas at an altitude of 12,900 feet, is tilting at 6.10 degrees. The temple is dedicated to Lord Shiva and is believed to be the highest of its kind in the world, and it is also the highest of the Devi Parvati Kedar temple located in the Pindrapnagar district.

LEARNING OUTCOME: This podcast will help you understand how man's interference with nature is impacting our ecosystems. The ASI is not ruling out land subsidence as one of the reasons, but they are also not connecting it to phenomenon of land sinking in Jharkhand.

Researchers at the Indian Institute of Technology (IIT) Madras have developed a low-cost Internet of Things (IoT)-based mobile air pollution monitoring framework that can be mounted on buses, cars and two-wheelers to gather spatio-temporal air quality data

Gynaec talk:

A seminar was held in Vishwa Vidyapeeth school (CBSE campus) on 13/6/2023 chaired by Dr.Punyashree from Cytecure Hospital. In this seminar the students of VIII, IX and X actively participated. The aim of the session was to create an awareness and knowledge about secondary sexual characters and functioning of the reproductive system. During adolescence, every girl and boy experience different physical and mental changes which are inevitable and therefore, highly important to learn about.

The session began with a call to all adolescents by quoting "let's accept the changes as they are normal and healthy". This session was enriched with tremendous information and witnessed multidisciplinary approach learning with different branches of sciences. A balanced healthy diet is always an immunity booster -immunology.The session included information on avoiding artificial colors.The session also highlighted about psychology of adolescents and the need to maintain the emotional balance during adolescence.The session overall helped every adolescent present to understand and accept their physical and mental changes. The session ended with a message to raise a strong voice against harassment and say no to violence -promote non-violence. Children being the future of India must be bold and courageous- again, a concept of sociology. The session was highly informative and interactive.

Dr Punyashree

Class III & Class XI Field trip To Gau Shala

In order to understand our Indian Hindu culture of worshiping Gau Matha and the responsibility of saving and protecting cows, Vishwa Vidyapeeth took the initiative of the Gau Shala visit to introduce Sanatana Dharma to our students .

Kamadhenu is the mythological symbol of divinity and is regarded as a wish fulfilling cow. It is said in Vedas that all the Gods and Goddesses including the trinity have their abode in the cow.

Under the guidance of our esteemed Director Smt. Suseela Santhosh and our Principal Smt. Shanthi Seetharaman students of class 3 and 11 were taken to Paramparika Gaushala, where the students gained knowledge outside the four walls of the classrooms. This was inclusive about the cow shed, how the cows are taken care of, their eating habits and food consumed. Initially they were a little hesitant but very eager to touch the cows. Students were excited to see the different kinds of bulls, cows and oxen. To promote their recapitulation, a questionnaire was prepared and sent to the respective classes.

FATHER'S DAY @ VVP

18th June

"A FATHER IS SOMEONE YOU CAN LOOK UP TO NO MATTER HOW TALL YOU GROW"

Gratitude is a gesture that we need to show! Vishwa Vidyapeeth school, CBSE this year thoughtfully organized the Father's day event in the Takshashila campus to bring in all the father's to bond with their kids! Students of class I cherished the Father's day celebration with their loving fathers. Our beloved Principal Smt. Shanthi Seetharaman ma'am addressed and inspired the gathering with her kind words. Students danced, played games and offered the little takeaways with the loving message to their fathers, which was a proud moment for all the dads present.

Parent- Teacher Meeting

A great opportunity to know the performance of students in academics and to ensure the student's best in non academic fields is through the Parent-Teacher Meet. This meeting is a great time to identify a student's strengths and weaknesses. The discussion enhances the parents and teacher how a child can be developed for a progressive future. An active participation in this ongoing process results in apt productivity of good results. In Vishwa Vidyapeeth class eleven underwent a PTM in the month of June which reflected well on the student's performance.

Library activities: “ Reading books makes you better.”

Students of class 1 to 5 are encouraged to read stories with rich illustrations. After reading, story telling is initiated. To promote memory skills, students of 6 to 8 are given 15 books randomly. In few minutes they must recall the name of the books and tell them.

ACHIEVERS FOR THE MONTH

ALL OUR DREAMS CAN COME TRUE IF WE HAVE COURAGE TO PURSUE THEM.

The co-curricular activities are really helpful for the holistic development of children. Vishwa Vidyapeeth is proud to inculcate various skills in our students and here are few who participated in several activities and secured the prizes.

ARIVU CLASSES (FOR DRIVERS) - KANNADA AND YOGA

Vishwa Vidyapeeth has taken this initiative to extend the teaching and learning process to the transport department. All the drivers are given a platform to better themselves in yoga and in learning kannada. We are proud of our Director Madam, Smt. Suseela Santhosh for this adult literacy education program initiated at our school campus.

Pottery classes:

At VishwaVidyapeeth pottery clay activity was organised as a part of LifeSkill activity in school premises for the development of eyes and hands coordination to guide them to open up the wings of their imaginations. It is a fun following activity enjoyed by every student.

This activity taught students about the ceramic history, the cultural influences of pottery, and how clay is a natural resource that is made from Earth. The students became aware of the process of pottery making by thoughtfully designing a clay pot using tactile skills. They also became aware of the different design elements that are used in making pottery (such as shape, color, texture, etc). The students learned to illustrate their knowledge of pottery by creating a functional piece of artwork. Understanding basic design elements and procedures in pottery making. At VishwaVidyapeeth to enlive the Sanatana Dharma these skill based activities hold utmost priority.

STUDENT REFLECTIONS on pottery classes

When I first did pottery, I remembered my childhood, when I played in the rain with my cousins, we used to make tiny sculptures with wet mud from the rain, so when I first explored pottery in the Art classes, I went down the memory lane which made me feel connected and I enjoyed every moment of the activity.

Amulya C Gowda
IX B

The pottery activity was new for me, but it was something I would love to learn and continue enjoying the experiences.

Uttam Bhonsle

Peer teaching: Class XI Students teaching Chemistry to Class X

On 14th June, the students of class X were voluntarily taught by their seniors, Roshni (XI Science) and Vaidyanath (XI Commerce). The topic covered by their seniors was about single displacement, based on the chapter -Chemical Reactions and Equations. As this session was meant to be highly interactive, the seniors began their session by learning and discussing the Reactivity series. They eventually moved on to talking about single displacement along with appropriate examples. They closed this highly informative session by asking the students some important questions. Their valuable guidance and patience were greatly appreciated by the students of class X.

PEER TEACHING: CLASS XI COMPUTER SCIENCE STUDENTS TEACHING ARTIFICIAL INTELLIGENCE TO CLASS VIII

An interactive session by the students of class XI (computer science) to their juniors of class VIII on the topic artificial intelligence was conducted on 26.06.2023. importance of Artificial intelligence, machine learning, cloud computing and big data were the highlights of the session. These sessions boost both confidence and morale of the students.

Peer Teaching: XI Students on Psychology for Grades X and IX

On June 27th, three students of class 11 cbse conducted a peer teaching session for students of class 10 and 9. The seminar was very helpful with psychological themes such as stress management which is a requirement for teenagers under pressure. The seniors spoke about trauma and how to overcome it. They seemed to have grasped everyone's attention like honey on bread and made the class a very engaging one. Demonstrations of relaxation and stress reducing techniques were done. One of those was called the newspaper crusher where one imagines the thin sheet of newspaper to be all their problems and punches straight through it creating a sense of satisfaction.

INNOVATION DESIGN THINKING AND ENTREPRENEURSHIP

The MIC and AICTE had organized an “Innovation, Design thinking and Entrepreneurship (IDE) Boot camp for students and faculty members/Teachers from higher Education Institutes and schools having a keen interest in innovation, design and entrepreneurship.

The IDE-boot camp was an intensive 5 days hands-on, experiential learning program where students will use multiple product design methodologies & Inculcate design thinking concepts and get an action-based experience. Students of VishwaVidyapeeth (Pavni Iyer -Gr XI commerce and Mahin R - Gr XI Science) and Teacher Ms. Rajeswari R attended the Bootcamp.

Students got an enriching exposure to know about the principles of Product Design, Innovation Validation, Design thinking, Value proposition, Business model and Marketing. Also got a chance to interact with Participants, Experts, Mentors, Start-up-Founders, and potential investors.Overall it was a wonderful experience to cherish forever.

Schrodinger's Grade

Have you ever felt a surge of satisfaction when you understood something that seems so wonderfully smart? Have you yearned for more of that intellectual thrill? I believe most of us have, as it is inherent in our nature to be inquisitive, to crave knowledge, and to aspire to personal growth. However, it is astonishing to realize that this feeling of fulfillment comes seldom for the majority of individuals. One may wonder what stifles our curiosity, and ironically, it is "fear" once again. It is ironic because the phrase "curiosity killed the cat" was the very foundation of Schrodinger's breakthrough into Quantum Physics. So, what exactly are we scared of? Personally, I fear not meeting expectations, which hinders my curiosity. Let me explain. In a social experiment, a teacher gave students scrambled words to unscramble. After solving the easier ones, they always choose the harder ones, driven by the urge to test themselves. However, when given the same words in a test, they chose the easier ones to secure better grades. We limit ourselves to what's easy, forgetting our desire to learn out of fear of grades. Let's break this system because "great minds don't do different things, they do things differently." Seek excellence, not just success, as being afraid to push limits is so incredibly foolish.

YOGAMAYA P
CLASS X

Vasudhaiva Kutumbakam is a Sanskrit phrase found in Hindu text such as the Maha Upanishad which means "The World is one family". Vedic tradition mentions "Vasudhaiva Kutumbakam" meaning all living beings on the earth are a family. The original verse appears in Chapter 6 of Maha Upanishad. It is considered the most important moral value in the Indian society. This verse of Maha Upanishad is engraved in the entrance hall of the Parliament of India. Subsequent shlokas go on to say that those who have no attachments go on to find the Brahman (The one supreme, universal spirit that is the origin and support of the phenomenal universe). The context of this verse is to describe as one of the attributes of an individual who has attained the highest level of spiritual progress and one who is capable of performing his worldly duties without attachment to material possessions. The text has been influential in the major Hindu literature that followed it, the popular Bhagavad Gita, the most translated of the Purana genre of literature in Hinduism. For example, the Vasudhaiva Kutumbakam adage of the Maha Upanishad is called the "Lafiest Vedantic Thought". Dr. N. Radhakrishnan, former director of the Gandhi Smith and Darshan Samith, believes that the Gandhian vision of holistic development and respect for all forms of life, nonviolent conflict resolution embedded in the acceptance of nonviolence both as a creed and strategy, were an extension of the ancient Indian concept of Vasudhaiva Kutumbaka. India's Prime Minister Narendra Modi used this phrase in a speech at the World Culture Festival, organized by Art of Living, adding that "Indian culture is very rich and has inculcated in each one of us with greater values, we are the people who have come from Aham Brahmasmi to Vasudhaiva Kutumbaka, we are the people who have come from Upanishads to Upproha (Satellite). It was used in the logo of the 7th International Earth Science Olympiad, which was held in Mysore, India in 2013. It was designed to emphasize the integration of the Earth's subsystems in the school curriculum.

Stamina

Majority of people face difficult situations and one of the most prominent factors is physical weakness. Being unable to walk or on the verge of fainting are relatable problems faced by everyone irrespective of age or gender and they may mess with our physical or mental health. These problems may never end, but it is very important to reduce them to their minimum. One of the most effective solutions is to build your stamina. Stamina is defined as the ability to sustain oneself in any long lasting physical or mental effort. Stamina development is much more important for young children but should be developed by people of all ages. Once stamina is developed to a suitable and apt level, it should be continuously maintained. Stamina is indirectly responsible for all types of sports and workouts and to achieve a fit and healthy lifestyle. Stamina also helps in keeping our mental state of mind healthy.

VIRTUAL REALITY

Over years virtual reality has become one of the most rapidly evolving technologies. With its realistic simulation we are now able to experience - education ,entertainment, healthcare, games and various other fields. Virtual reality(VR) transports the user into a whole new world of digital environment. In the article I will be explaining about virtual reality and its benefits. At its core, virtual reality refers to a computer-generated simulation that enables users to interact with and explore virtual environments. There is motion tracking systems and handheld controllers enable users to interact with and manipulate objects within the virtual world, further enhancing the immersive experience.

BENEFITS OF VIRTUAL REALITY

- **Immersive Experiences:** Virtual reality provides a level of immersion and presence that is unparalleled by any other medium. By transporting users to realistic or imaginative digital environments, VR creates a sense of being physically present within the virtual world.
- **Enhanced Learning and Training:** Virtual reality has immense potential in education and training. By creating realistic simulations, VR allows learners to practice and experience scenarios without real-world risks.
- **Increased Engagement and Interactivity:** VR encourages active participation and engagement. Users can manipulate objects, interact with virtual characters, and make decisions that influence the outcome of the experience.
- **Visualization and Understanding:** Virtual reality enables users to visualize and experience concepts and data in a three-dimensional space. This enhances spatial understanding, especially in fields such as architecture, engineering, and design.

Virtual reality has emerged as a game-changing technology, offering unprecedented opportunities for immersive experiences and transforming various industries. From entertainment and education to healthcare and beyond, VR has the potential to reshape the way we interact, learn, and perceive the world around us. As virtual reality continues to evolve and mature

GRRANTH BIYANI

MOTHER NATURE

TEACHER'S
CORNER

Oh mother nature, we are your guest,
And you have always given us the best

From ocean depths to mountain peaks,
Mother nature moves and speaks

Little fishes in the pond,
Rainbow colours in the sky and beyond

I learn from your tide,
To echo from inside

You dazzle and more,
To nurture us to the core

The leaves moving to the breeze,
Make me smile and freeze,

Around me are many things,
I feel like butterfly with my wings

I love the nature and its beauty,
To save it – is really our duty

Come on friends,
lets develop a planting culture
And have a great future !
