Show and Tell

"Show and tell" is the practice of presenting a product to an audience while displaying and describing it, usually a toy or other child-oriented item. On September 29.09.22, Class 1 and 2 had a Show and Tell Activity to foster the young students' verbal and public speaking skills. The students engaged in this exercise, which raised their self-esteem and sense of value. It aided in the development of their descriptive skills since it allowed children to orally describe their thoughts, feelings and emotions.

# NAVARATRI ASSEMBLY

During the special assembly for Navaratri, there were two sets of performances: one had teachers and students dancing to **garba beats** and the other featured teachers and students performing in front of **Durga Maa**. The dance performances by both groups of performers were breath taking to watch. The day was made extra wonderful by the class **3 students' flute** and **Bengali song**.

# Hindi Diwas

Hindi diwas is celebrated with pride and vigour. The students of grade 1 to 8 gave informative speeches and spoke about the importance of Hindi. The dance performance by grade 1, 2 and 3 students was a cherry on the cake.

## *Creative Twist for the holiday*

During the Dussehra holidays, we posed a creative challenge for all our students. The Art Teacher *Mr Kunal* had shared a picture with students and they sent back some excellent art works. It can be truly said that there is an artist in every child!

# NEWS CORNER

## Class 5 students Sidhi Pradhan and Pramath Iyer article in Deccan Herald.

**T**he changes in weather patterns and temperature over an approximate course of 30 years is referred to as climate change. But human activities are accelerating this phenomenon at an alarming rate.

The ozone layer creates a cover over the earth to protect it from the harmful ultraviolet rays of the sun.

The depletion of the layer could spell danger for humanity.

Every year, September 16, is observed as World Ozone Day. Children tell *Open Sesame* the disasters they think will befall earth in the next 20 years if people ignore the vital signs of climate change.

### Catastrophes ahead

Sixteen-year-old Aayushi Karthik believes that if humans don't pay heed to climate change, the earth will deteriorate. She might witness catastrophic floods, hurricanes and droughts. The world is extinct in about 20 years, she says.

Stopping the emission of CO2 and other greenhouse gases can help in protecting the earth, feels Aayushi. She adds, "We should use green and electric vehicles."

There must be a balance between the two to ensure the O2-CO2 balance," he says.

### All dull no colour

"The earth wouldn't look green anymore. It would become a very dry place. There would rarely be rainfall," says Aarav Nandari.

Green transport is the way to go. Aarav says, "We can stop this by walking or cycling short distances rather than using a car or bike."

### A concrete jungle

"I see earth as a concrete jungle with no greenery," says 10-year-old Siddhi Pradhan. She believes that carrying oxygen cylinders

**Pradhan, says carrying oxygen cylinders will feel as normal as carrying water bottles today. She urges everyone to use renewable sources of energy like wind, water and sunlight instead of fossil fuels.**

### grim future

**T**he changes in weather patterns and temperature over an approximate course of 30 years is referred to as climate change. But human activities are accelerating this phenomenon at an alarming rate.

The ozone layer creates a cover over the earth to protect it from the harmful ultraviolet

than that of afforestation or reforestation. There must be a balance between the two to ensure the O2-CO2 balance," he says.

**All dull no colour**  
"The earth wouldn't look green any-

rarely be w Nandari. is the way We can stop cycling short an using a

en cylinders as carrying y. She urges renewable like wind, instead of

the World

### A decade to save the world

**Pramath Iyer says we don't have much time left to fight climate change. "Scientists have said we have a decade to keep carbon dioxide from reaching catastrophic levels," says the 10-year-old.**

He fears for the plants and animals. "By 2042, 15% to 37% of all plant and animal species are predicted to become extinct. By 2100, half of all species may experience extinction," he notes.

He believes stricter laws need to be put into place to ensure we have a greener and safer planet in the future.

### A concrete jungle

"I see earth as a concrete jungle with no greenery," says 10-year-old Siddhi Pradhan. She believes that carrying oxygen cylinders will feel as normal as carrying water bottles today. She urges everyone to use renewable sources of energy like wind, water and sunlight instead of fossil fuels.

### A decade to save the world

**Pramath Iyer says**

# INDIAN CULTURE

Indian culture is diverse and vibrant. It is important that children continue to uphold their traditions, and maintain the values passed on from generations. Here are a few snippets from an article - Why is it imperative to educate children about Indian culture and traditions featured on the Financial Express.

Here are a few excerpts on the article written by Vishwa Vidyapeeth Director Ms. Suseela Santhosh.
